This flowchart
demonstrates that the user
inputs a number, the
program evaluates the
number to decide if it
greater than 100.

Start

User inputs a
number into
the program

Save the number
to the program

Is what number the user
input into the program
greater than 100?

No, the number that
the user input is not
greater than 100

Yes, x is greater than 100

Output to the
user that the
number they
have input is
not greater
than 100

Output to the user
that the number
they have input is
greater than 100

End
